### Reference

---

We purchased 2 sets of key-coverings from Malec Key Tops made of natural bone, to replace some worn out plastic coverings on a two manual organ-keyboard from the 1960's.

We were extremely pleased with the material we got from Malec. The bright white color, the even, fine-grained structure of the bone and the accurate measurements made it a pleasure to use. The result is perfect and the customer is very satisfied.

The Malec company showed prompt and friendly responses to our inquiries, delivery was on time.

We certainly will continue to order any bone we need from Malec Key Tops, both for new instruments and restorations.

Yours sincerely

Peter Meier Orgelbau GmbH
